

Internship Report

Airpay Payment Services is a payment platform which aids global ecommerce & retail. It helps businesses envision a world beyond cash providing the best experience to merchants and their customers. airpay is an all encompassing payment gateway solution provider, working towards making monetary transactions simpler, easier and quicker . It has various fields such as Now Pay, School Pay, Hotel Pay etc.

I have worked with the tech team of Airpay Payment Services under the guidance of Mrs. Kinnari Kansar as an intern from June 10 2019 to June 28 2019.

My responsibilities at Airpay Payment Services was to debug and run their python scripts which link their databases. I also helped the tech support team with testing and creating payment gateway solution required to the clients of School Pay. I have also worked with processing and categorizing of data from master key format to the formats required for each bank individually.

Apart from the technical knowledge I have gained working with python scripts and database management, I have also learned a lot about the corporate environment, the importance to meet the deadline, communication with people in a formal way at an office.

Airpay Payment Services helped me to improve my skills in python language, introduced me to the database management systems, and improved my communication skills.
