

Internship Report

Nutpam Technologies is an MSME Enterprise having expertise in R&D in Electronics product development and Embedded systems. Their product range includes Pressure sensors, Smart card readers, Trainer kits and WSN nodes.

I have worked with the tech team of Nutpam Technologies as an intern from August 16 2023 to September 09 2023.

In this internship program, I learnt about making android apps using android studio and java language. I have developed a login app, date picker app, time picker app, image view, button, list view etc. I have also gained some information about xml. I was also introduced with operating systems and an brief of history of android operating system, its updates and the architecture.

Apart from the technical knowledge I have gained working with java and android studio, I have also learned a lot about the corporate environment, the importance to meet the deadline, communication with people in a formal way at an office.

Nutpam technologies helped me to improve my skills in java language, introduced me to the android studio, and improved my communication skills.
