# Engineering Mathematics for Semesters III and IV

# **Engineering Mathematics** for Semesters III and IV

Prelims\_CB-EM-II.indd 1 4;46;54 PM

# **About the Authors**

C B Gupta is presently working as Professor in the Department of Mathematics, Birla Institute of Technology and Science, Pilani (Rajasthan). With over 25 years of teaching and research experience, he is a recipient of numerous awards like the Shiksha Rattan Puraskar 2011, Best Citizens of India Award 2011, Glory of India Award 2013, and Mother Teresa Award 2013. He was listed in Marquis' Who's Who in Science and Technology in the World 2010 and 2013, and in top 100 scientists of the world in 2012. He obtained his master's degree in Mathematical Statistics and PhD in Operations Research from Kurukshetra University, Kurukshetra. His fields of specialization are Applied Statistics, Optimization, and Operations Research. A number of students have submitted their thesis/dissertations on these topics under his supervision. He has published a large number of research papers on these topics in peer-reviewed national and international journals of repute. He has authored/co-authored 12 books on Probability and Statistics, Quantitative Methods, Optimization in Operations Research, Advance Discrete Mathematics, Engineering Mathematics I-III, Advanced Mathematics, and the like. He is also on the editorial board and a reviewer of many national and international journals. Dr. Gupta is a member of various academic and management committees of many institutes/universities. He has participated in more than 30 national and international conferences in which he has delivered invited talks and chaired technical sessions. He has been a member of Rajasthan Board of School Education, Ajmer, and also a member of various committees of RPSC Ajmer, UPSC, New Delhi, and AICTE, New Delhi.

**S R Singh** is presently working as an Associate Professor in the Department of Mathematics at Chaudhary Charan Singh University, Meerut (Uttar Pradesh) and has an experience of 20 years in academics and research. His areas of specialization are Inventory Control, Supply-Chain Management, and Fuzzy Set Theory. He has attended various seminars/conferences. Fifteen students have been awarded PhD under his supervision. He has published more than hundred research papers in reputed national and international journals. His research papers have been published in *International Journal of System Sciences*, *Asia Pacific Journal of Operational Research*, *Control and Cybernetics*, *Opsearch*, *International Journal of Operational Research*, Fuzzy Sets and Systems, and International Journal of Operations and Quantitative Management. He has authored/co-authored nine books.

**Mukesh Kumar** is presently working as an Associate Professor in the Department of Mathematics at Graphic Era University, Dehradun (Uttarakhand). He received an MPhil in Mathematics from Indian Institute of Technology, Roorkee, and PhD in Mathematics from HNB Garhwal Central University, Srinagar, Uttarakhand. He has academic experience of more than 12 years. His fields of specialization are Inventory Control, Supply Chain Management, Operations Research and Applied Mathematics. He has published numerous research papers in national and international reputed journals. He is also on the editorial board and reviewer of many national and international journals and have authored two books on mathematics.

Preface		xvii
1. Four	ier Transforms	1.1-1.64
1.1	Introduction	1.1
1.2	Fourier Integral Theorem	1.2
1.3	Fourier Integral in Complex Form	1.4
1.4	Fourier Transform	1.8
1.5	Fourier Cosine and Sine Transforms	1.9
1.6	Properties of Fourier Transform	1.24
1.7	Parseval's Theorem	1.29
1.8	Fourier Transform of Some Basic Functions	1.32
1.9	Discrete Fourier Transform	1.36
	Exercise 1.1	1.41
	Answers	1.44
1.10	Finite Fourier Transform	1.45
1.11	Inverse Finite Fourier Transform	1.45
	Exercise 1.2	1.46
	Answers	1.47
	Exercise 1.3	1.56
	Answers	1.56
	Summary	1.57
	Objective Type Questions	1.62
	Answers	1.64
2. <b>Z</b> -Tra	ansforms	2.1-2.41
2.1	Introduction	2.1
2.2	Basic Concept of Sequence	2.1
	Z-Transform	2.4
	Exercise 2.1	2.9
	Answers	2.9
2.4	The Inverse Z-Transform	2.10
	Exercise 2.2	2.13
	Answers	2.13

Prelims\_CB-EM-II.indd 5 4;46:55 PM

**vi** Contents

	Properties of the Z-Transform	2.14
	Convolution of Sequences	2.17
	Table of Z-transforms	2.26
2.8	Some Useful Inverse Z-transform	2.28
2.9	Solution of Difference Equations using Z-Transforms	2.28
	Exercise 2.3	2.33
	Answers	2.33
	Exercise (Mixed Problems)	2.34
	Answers	2.35
	Summary	2.35
	Objective Type Questions	2.39
	Answers	2.41
3. Comp	olex Variables and Calculus	3.1-3.130
3.1	Complex Number	3.1
	Equality of Complex Numbers	3.1
	Fundamental Operations with Complex Numbers	3.1
	Division of Complex Numbers	3.2
	Modulus of a Complex Number	3.3
	Geometrical Representation of Complex Numbers	3.3
	Polar Form of a Complex Numbers	3.3
	Conjugate Complex Number	3.4
	De Moivre's Theorem	3.4
	Roots of a Complex Number	3.7
	Euler's Formula	3.8
	Exponential (or Eulerian) Form of a Complex Number	3.8
	Circular Functions	3.8
	Hyperbolic Functions	3.10
	Real and Imaginary Parts of Circular Function	3.11
	Logarithm of a Complex Number	3.11
5.10	Exercise 3.1	3.15
	Answers	3.16
3 17	Summation of Trigonometric Series – $(C + iS)$ Method	3.16
	Introduction to Theory of Complex Variables	3.19
	Basic Concepts of the Complex Variable	3.19
	Cauchy–Reimann equations	3.21
	Harmonic and Conjugate Harmonic Functions	3.27
	Method of Constructing Conjugate Function	3.28
3.23		3.29
	Determination of Velocity Potential and Stream Function	3.38
J.4 <del>4</del>	Exercise 3.2	3.40
	Answers	3.41
3 25	Introduction to Complex Integration	3.42
	Line Integral in Complex Plane	3.42
	Complex Function Integrals	3.43
	Properties of Complex Integrals	3.43
3.40	roperties of Complex integrals	5.43

Prelims\_CB-EM-II.indd 6 4;46:55 PM

Contents	vii
Lontents	VI

	English 2.2	2.50
	Exercise 3.3 Answer	3.50
2.20		3.50
	Cauchy Fundamental Theorem	3.51 3.51
	Cauchy's Theorem Cauchy's Integral Formula	3.51
	Cauchy Integral Formula for the Derivative of an Analytic Function	3.53
	Cauchy Integral Formula for Higher Order Derivatives	3.54
	Poisson's Integral Formula	3.54
	Morera's Theorem (Converse of Cauchy's Theorem)	3.54
	Fundamental Theorem of Integral Calculus	3.55
	Cauchy's Inequality Theorem	3.56
	Liouville's Theorem	3.56
	Expansion of Analytic Functions as Power Series	3.57
	Exercise 3.4	3.73
3.40	Zeros of an Analytic Function	3.73
	Singularities	3.74
	Exercise 3.5	3.76
	Answer	3.78
3.42	The Calculus of Residues	3.79
	Cauchy's Residue Theorem	3.80
	Exercise 3.6	3.87
	Answers	3.88
3.44	Evaluation of Real Definite Integrals	3.88
3.45	Improper Real Integrals of the Form $\int_{-\infty}^{\infty} f(z) dz$	3.94
3 46	Improper Integrals with Poles on the Real Axis	3.97
3.10	Exercise 3.7	3.98
3.47	Conformal Mapping	3.99
	Bilinear (or Mobius or Fractional) Transformation	3.104
	Cross Ratio	3.105
	Applications of Complex Variables	3.109
	Exercise 3.8	3.115
	Answer	3.116
	Summary	3.117
	Objective-Type Questions	3.122
	Answers	3.130
4. Empi	rical Laws and Curve Fitting	4.1-4.32
4.1	Introduction	4.1
	Scatter Diagram	4.1
	Curve Fitting	4.1
4.4	Graphical Method	4.2
	Exercise 4.1	4.6
	Answer	4.6
4.5	Least Square Method	4.7

# **Preface**

Engineering Mathematics for Semesters III and IV deals with the applications of applied Mathematics in the field of Engineering. This subject is generally taught in the III and IV semester of engineering. In the first edition of book "Engineering mathematics for Semester I and II" we learnt about the basics of engineering mathematics as a branch of applied mathematics concerning mathematical models (mathematical methods and techniques) that are typically used in engineering and industry. This book on semesters III and IV will prepare students for their domain specific study and applications in their respective branches.

This book will also introduce the students to the concepts of Fourier transform, z-transform, complex variable, probability and numerical techniques.

#### Salient Features

- Engrossing problem sets based on **real life situations**
- 360° coverage of subject matter: **Introduction–History–Pedagogy–Applications**
- Introduction to Fourier Transform, Z-transform, Complex Variable, Probability and Numerical Techniques with reference to **applications in the field of engineering**
- 582 Solved problems with stepwise solutions with answers
- 535 MCQs for various competitive examinations
- Appendix includes Statistical tables and chapter-wise list of formulae
- Other pedagogical aids include:
  - ◆ Drill and Practice Problem: 1100

## **Chapter Organization**

The book is divided in fifteen chapters. In **Chapter 1**, we have discussed Fourier transform which includes Fourier transform of some basic functions and the properties of the Fourier Transform. **Chapter 2** deals with Z-Transform, inverse Z-transform, Cauchy's residue theorem, convolution theorem and properties of Z-transform. In **Chapter 3**, basic concepts of complex theory including basic concepts of complex numbers, Cauchy–Riemann equations, conjugate and conjugate harmonic equations, complex integrals, expansion of analytic functions as power series, zeros of analytic functions, calculus of residues, singularities, complex integrals, Cauchy's residue theorem, etc., are discussed. **Chapter 4** covers empirical laws and curve fitting along with scatter diagram and various methods of curve fitting. In **Chapter 5**, we present various statistical methods while in **Chapter 6** basic concepts of probability such as additive law, multiplicative and conditional probability, Baye's theorem,

Prelims\_CB-EM-II.indd 17 4/28/2016 4:46:55 PM

**xviii** Preface

probability distribution (discrete and continuous in general and some specific distributions such as binomial, Poisson, uniform, exponential and normal are discussed. Chapter 7 deals with sampling, inference and testing of hypotheses which includes parameters and statistics, type I and II errors, confidence intervals and F, chi-square and Z statistic. In Chapter 8, various formulas for numerical differentiation and integrations are discussed while Chapters 9 and 10 deal with numerical solution of differential equations and finite differences and interpolation, respectively. Chapters 11 and 12 talk about numerical solutions of ordinary differential equations and partial differential equations, respectively. In Chapter 13, linear programming and various methods to solve linear programming including transportation and assignment problems, duality and dual simplex method, etc., have been discussed. Chapters 14 and 15 cover the method of variational with fixed boundaries while Chapter 15 deals with integral equations.

## Acknowledgements

The authors are thankful to all who have directly or indirectly helped them during the preparation of this book. We are also thankful to all our family members for their encouragement, patience, and all possible help provided by them while we were engaged in writing the manuscript. We would also like to thank the following reviewers for their feedback and comments:

Preface xix

We wish to express our appreciation for the support provided by the staff at McGraw Hill Education (India) during the publication of this book.

## **Feedback Request**

We shall be grateful to acknowledge any constructive comments/suggestions from the readers for further improvement of the book.

C B GUPTA S R SINGH MUKESH KUMAR

#### Publisher's Note

McGraw Hill Education (India) invites suggestions and comments from you, all of which can be sent to *info.india@mheducation.com* (kindly mention the title and author name in the subject line).

Piracy-related issues may also be reported.
