Internship Report

Web development internship which allows you to work with professionals and complete the industry based projects which will help you to gain more knowledge about the Web development and how the insurers projects are working.

I have worked with the tech team of Prodigy Infotech as an intern from September 1 2023 to September 30 2023.
I also competed 4 projects in which I implemented all the knowledge of Web development and deployed then on the github repository ..

Apart from the technical knowledge I have gained working with Javascripts and database management, I have also learned a lot about the corporate environment, the importance to meet the deadline, communication with people in a formal way at an office.

Prodigy infotech helped me to improve my skills in Web development language, introduced me to the database management systems, and improved my communication skills.
